Experience

MERN Stack Developer At Zikrabyte Solutions | Jan 2025 – Present

Currently working as a MERN stack developer at Zikrabyte Solutions, where I am responsible for developing and maintaining web applications, collaborating with team members, implementing new features, and ensuring smooth performance and usability of the platform.

Project

BECHDU – Complete Marketplace for Buying & Selling Electronics

- Built a multi-role ecosystem with Admin, User, Vendor, Mini-Vendor, and Partner panels for smooth operations.
- Added location-based visibility so users only see products available in their region for better relevance.
- Implemented multi-vendor flows with partner pickup, shipping tracking, and full order lifecycle handling.
- Integrated Razorpay payments, promo codes, checkout flows, seller payouts, and Firebase notifications.
- Built a scalable backend with Node.js, Express.js, MongoDB, and a fast UI using React.js, Next.js, Tailwind CSS.
- Added advanced modules like device evaluation, partner assignment, vendor inventory sync, and tracking.
- Built advanced modules like device evaluation, partner assignment, vendor inventory sync, and dispatch tracking.

SELLSMART – Electronics Selling & Instant Cash Platform

- Built a platform for users to sell used electronics with instant cash and doorstep pickup services.
- Implemented partner workflows for device pickup, verification, and cash handling.
- Developed admin dashboard for managing products, pricing, partners, and pickup requests.
- Built end-to-end order lifecycle flow from request creation to final completion.
- Implemented partner assignment and real-time status tracking for smooth operations.
- Built secure APIs and real-time updates using Node.js, Express.js, MongoDB, and responsive UI with React.js.

SOCIAL NOTCH – Event Management Platform

- Developed a multi-role platform for vendors, admins, and customers with dedicated dashboards.
- Implemented event creation, booking workflows, approval systems, and real-time updates.
- Built full-stack application using React.js, Tailwind CSS, Node.js, MongoDB.
- Integrated payment workflows and automated ticket generation system.

CODESHARK – Coding Institute Technology Website

- Developed interactive frontend for course browsing, user demo requests, and enrollment workflows.
- Built admin backend to manage courses, batches, instructors, and content for all skill levels.
- Enabled dynamic course filtering, student registration, and personalized dashboards.
- Used Next.js for server-side rendering and MongoDB for structured course and user data storage.

MGBW – Mangalore Ganesh Beedi Works

- Developed the official website for MGBW Group, showcasing diversified businesses.
- Built using Next.js, Tailwind CSS, TypeScript, and Brevo for optimized performance and scalability.
- Designed a modern, responsive, and user-friendly interface for smooth navigation.
- Integrated Brevo for communication and notification workflows.

ARD PERFORMANCE – Automotive Marketplace Ecosystem

- Built a full-stack multi-vendor platform for automotive performance parts and tuning services.
- Engineered order-splitting system with ACID-compliant transactions for multi-vendor checkout.
- Integrated Shiprocket logistics, Razorpay payments, and automated PDF invoicing using Puppeteer.
- Built scalable backend using Node.js, TypeScript, MongoDB and frontend with React.js.

GETFIXED – Electronics Repair Booking Platform

- Developed a complete service booking system with real-time technician tracking and status updates.
- Built dynamic admin dashboards and technician assignment workflows for efficient operations.
- Designed REST APIs using Node.js, Express.js, with structured data modeling using Mongoose.
- Implemented role-based access control and optimized backend performance for scalability.
- Built scalable backend using Node.js, TypeScript, MongoDB and frontend with React.js.

Technical Skills

- Frontend: React.js, Next.js, Tailwind CSS, JavaScript (ES6+), TypeScript, HTML5, CSS3
- State management: Redux Toolkit, React Context
- React Libraries: React Query, React Hook Form, Axios, Framer Motion, GSAP, Anime.js, Aceternity UI, shadcn/ui
- Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Multer, Nodemailer, EmailJS
- Database: MongoDB, Mongoose
- Dev Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Netlify, Render
- Cloud & Integrations: AWS S3, Firebase, Razorpay, Shiprocket, MSG91 (OTP Services), Brevo (Email Services)

STRENGTH

- Strong problem-solving skills with focus on scalable solutions.
- Hands-on experience in full-stack (MERN) application development.
- Ability to write clean, maintainable, and efficient code.
- Quick learner with adaptability to new technologies and tools
